

Brand Color Guide

Palette, rules and web tokens for every Hermes Wraps touchpoint

Version 1.0 | October 2026 | Source of truth: brand/tools/build_brand_guide.py

01 SOURCE & METHOD

Where the colors come from

Colors were measured pixel by pixel, not picked by eye. Each image was split into regions (disc, background, emblem, wordmark, card face, linework) and clustered to find its dominant tones. The logo file is the master reference because it is digital. The card is a phone photo, so lighting and the paper finish shift its values a little. The card confirms the same burgundy + gold family and adds one extra tone: the copper linework.

Logo (digital master)

	#460714	Disc (38% of pixels)
	#1A0307	Outer background
	#C9A477	Gold midtone
	#EDCA9D	Gold highlight
	#A27B55	Gold shadow
	#F4D394	Outer ring
	#070302	Emblem outlines
	#F7F4EC	Brightest highlight

Business card (photo)

	#50151D	Card face (lit, reads lighter)
	#D7B895	Title gold
	#ECC18B	'US' gold
	#C7755E	Copper linework
	#F7F5F6	White text

Reading the numbers: the card face measures #50151D against the logo's #460714. That is the same burgundy under room light. The website uses the logo values. Printed items should be proofed against a physical sample before a large run.

02 THE FIVE COLORS THAT DEFINE THE BRAND

Core palette

PRIMARY

Hermes Burgundy

`--hw-burgundy`

`HEX #460714  RGB 70 7 20  CMYK 0 90 71 73`

Use: Hero bands, header, footer, primary buttons, section anchors.

Measured from: Logo disc - 38% of all logo pixels

ACCENT

Wraps Gold

`--hw-gold`

`HEX #C9A477  RGB 201 164 119  CMYK 0 18 41 21`

Use: Buttons and icons on dark, dividers, key figures. Never as text on light backgrounds.

Measured from: Emblem + wordmark gold, midtone

DARK BASE

Midnight Wine

`--hw-midnight`

`HEX #1A0307  RGB 26 3 7  CMYK 0 88 73 90`

Use: Dark sections, overlays on project photos, footer base.

Measured from: Logo outer background

STRUCTURE

Carbon Black

`--hw-carbon`

`HEX #0A0A0A  RGB 10 10 10  CMYK 0 0 0 96`

Use: Body text on light backgrounds, outlines, the tagline bar motif.

Measured from: Emblem outlines, 'Vinyl Specialists' bar

LIGHT BASE

Ivory

`--hw-ivory`

`HEX #F7F4EC  RGB 247 244 236  CMYK 0 1 4 3`

Use: Main page background, text on burgundy / midnight.

Measured from: Wordmark highlights, card text

03 EXTENDED PALETTE

Supporting tones & web additions

Supporting tones come from the logo and card too. Use them for detail, depth and interaction states, never as the main color of a section.

Gold Highlight
#EDCA9D
Gold hover state, gold text on burgundy.

Gold Shadow
#A27B55
Borders, gradients. Large text only on ivory.

Ring Gold
#F4D394
Thin rules, badges, the circle frame.

Burgundy Lift
#5B1B26
Hover / pressed state for burgundy surfaces.

Copper Line
#C7755E
Decorative lines only. Never text, never buttons.

Web-only additions

These are not in the logo. A corporate website needs a legible gold for text, a second light background and a secondary text gray. Each is derived from the brand family and passes WCAG AA.

Gold Text
#7D5C38
The only gold allowed for text on ivory / stone (5.5:1).

Stone
#ECE6DC
Alternate section background next to ivory.

Warm Gray
#6B5F57
Secondary text, captions, form hints (5.6:1).

Tints & shades

For backgrounds, borders and states only. Mixed from the core colors.

Burgundy	#ECE6E8	#D1C1C4	#A2838A	#74454F	#460714	#31050E	#1C0308
Gold	#FAF6F1	#F2E8DD	#E4D2BB	#D6BB99	#C9A477	#8D7353	#504230

What the palette says

Hermes Wraps is a young company led by someone with 8+ years of hands-on experience. The goal is to become a trusted contractor for medium to large US companies. Those buyers are fleet managers, marketing teams and procurement departments. The palette already speaks their language. The job of the website is to use it with discipline.

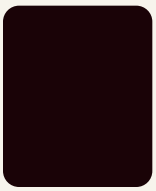

Burgundy = established, trustworthy

Deep reds are the color of institutions: universities, law firms, heritage brands. To a corporate buyer it signals stability and seriousness, the opposite of a fly-by-night shop.

Gold = premium craftsmanship

Gold says the work is finished to a high standard. Used sparingly, it makes the brand feel premium. Used everywhere, it feels flashy. Keep it to roughly 10% of any screen.

Midnight + Carbon = precision

The near-black tones carry the sharp lines of the emblem and the 'Vinyl Specialists' bar. They read as technical and exact, which matters to a client handing over a fleet.

Copper + the angled wordmark = young energy

The youth shows in the movement, not in louder colors: the forward-leaning italic, the winged helmet, the card's copper linework. Use these as accents of motion, not as the base.

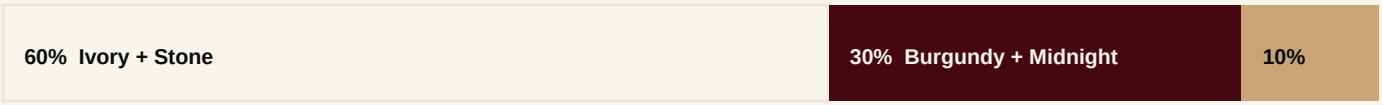

THE BALANCE TO KEEP

Corporate buyers skim. They want clarity, proof and an easy way to request a quote. So the site should be mostly light (ivory/stone) with burgundy as the confident anchor and gold as the finishing touch. A fully dark burgundy site reads as nightlife or luxury retail, not as a contractor you can trust with 200 vehicles.

05 GUARDRAILS

Website color rules

60 / 30 / 10 split

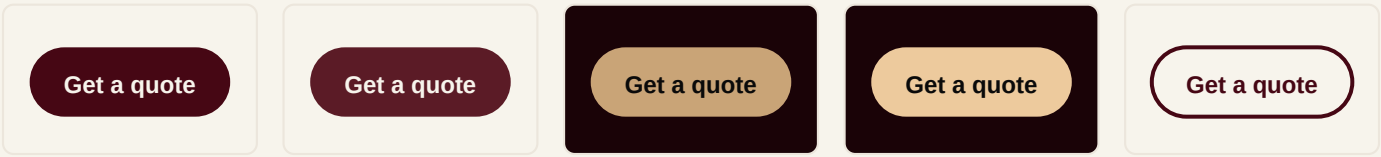

60%: page backgrounds and breathing room. 30%: header, hero, footer, primary buttons. 10%: buttons on dark, icons, dividers, key numbers like '8+ years'.

Approved text / background pairs

Aa Sample	Body text 18.0:1 PASS AA	Aa Sample	Headings, links 14.7:1 PASS AA
Aa Sample	Gold text on light 5.5:1 PASS AA	Aa Sample	Captions 5.6:1 PASS AA
Aa Sample	Text on burgundy 14.7:1 PASS AA	Aa Sample	Gold text on burgundy 10.4:1 PASS AA
Aa Sample	Gold on dark 8.5:1 PASS AA	Aa Sample	Gold button label 8.5:1 PASS AA
Aa Sample	NOT ALLOWED 2.1:1 FAIL	Aa Sample	NOT FOR TEXT 4.7:1 AVOID

Buttons & links

Primary | Primary hover | On dark | On dark hover | Secondary

Links: Burgundy, underlined on hover. On dark: Gold Highlight. Focus ring: 2px Ring Gold with 2px offset, visible on every interactive element.

DO

- Keep backgrounds mostly ivory / stone
- Use burgundy for one strong band per page
- Let project photos carry the color
- Use gold for one CTA per screen
- Check contrast before adding any new pair

DON'T

- Put Wraps Gold text on light backgrounds
- Use copper for text or buttons
- Add new hues (blues, greens, neons)
- Use gradients other than gold metallic
- Place the logo on busy photos without a dark plate

Web tokens & checklist

The website must use these variables from `brand/tokens.css` and never hard-coded colors. Components should reference the role tokens so the palette can be adjusted in one place.

```
--hw-bg:                    var(--hw-ivory);
--hw-bg-alt:                var(--hw-stone);
--hw-bg-dark:               var(--hw-midnight);
--hw-surface-brand:         var(--hw-burgundy);
--hw-text:                  var(--hw-carbon);
--hw-text-muted:            var(--hw-warm-gray);
--hw-text-on-dark:          var(--hw-ivory);
--hw-heading:               var(--hw-burgundy);
--hw-link:                  var(--hw-burgundy);
--hw-link-on-dark:          var(--hw-gold-highlight);
--hw-accent:                var(--hw-gold);
--hw-accent-text:           var(--hw-gold-text);
--hw-btn-primary-bg:        var(--hw-burgundy);
--hw-btn-primary-bg-hover:  var(--hw-burgundy-lift);
--hw-btn-primary-text:      var(--hw-ivory);
--hw-btn-dark-bg:           var(--hw-gold);
--hw-btn-dark-bg-hover:     var(--hw-gold-highlight);
--hw-btn-dark-text:         var(--hw-carbon);
--hw-focus:                 var(--hw-ring-gold);
```

Before shipping any page

- [ ] Every color comes from tokens.css. No new hex values in the code
- [ ] The page is mostly ivory / stone, with one burgundy band and gold limited to about 10%
- [ ] Every text pair is on the approved list (4.5:1 minimum, 3:1 for text 24px+)
- [ ] Gold text on light backgrounds uses Gold Text (#7D5C38), never Wraps Gold
- [ ] The logo sits on Midnight Wine, Burgundy or a dark plate, never on busy photos
- [ ] Focus states are visible (Ring Gold outline) for keyboard users
- [ ] Page tone fits a corporate buyer: clear, calm, with proof (projects, fleet clients, years)

Asset notes: the logo provided is a 1024px JPG with an AI-generator sparkle in the bottom-right corner. Before launch, get a clean vector logo (SVG / PDF), plus transparent PNGs in full-color and one-color gold versions. CMYK values in this guide are computed starting points. For print, match them to a Pantone / vinyl swatch and proof physically.
